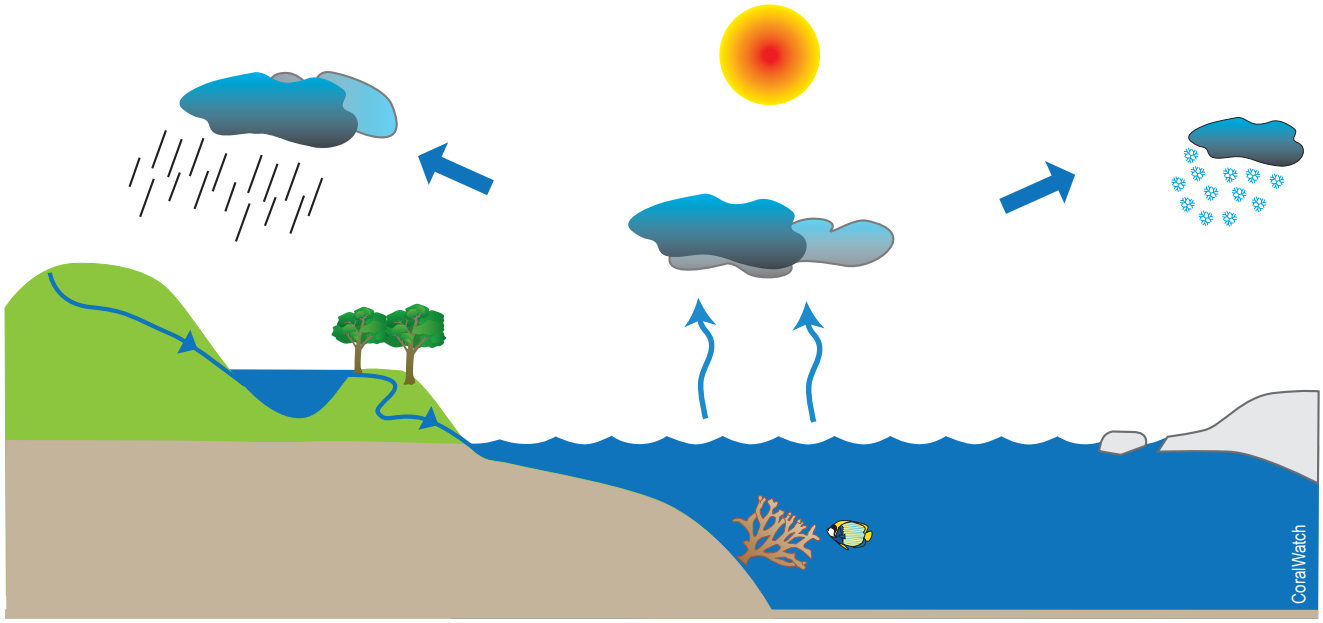
The water cycle



Instructions

1. Label the diagram above with the following words:

Liquid	Gas	Solid
Evaporation	Precipitation	Condensation

2. Fill in the blanks using: Condensation, Evaporates & Preciptation

Water from the oceans _____ and enters the atmosphere in the form of water vapour.

When water vapour cools down, it becomes liquid again, _____ into small droplets, which form clouds.

When clouds become too heavy, the water vapour returns to earth as _____.

3. Label the three physical states of water with: Liquid, Solid & Gas

Water vapour	Precipitation	Iceberg
1._____	2._____	3. _____
