The CoralWatch Ambassador program provides the opportunity to be part of a citizen science community that cares for corals and reef conservation. During the workshop you will learn what’s happening to our reefs and how you can deliver positive messages to inspire audiences to act. You will help collect data and analyse CoralWatch data, share results and educate others about the importance of reefs.

WORKSHOP CONTENT
• Presentations (coral biology, CoralWatch monitoring, sustainability, data)
• Working sessions (roleplay, project development, science communication, planning, practice sessions, data entry)
• Fieldwork (snorkeling, collecting data, practising monitoring methods)
• Certificate upon completion

YOUR CONTRIBUTION
• Engage in community events (schools, festivals, workshops, conferences e.g.)
• Collect and upload Coral Health Chart data and inspire others
• Report/liaise on outreach activities and experiences to CW
• $200 AUD workshop contribution
• Travel to Hervey Bay from your location

EGLIBILITY
• Confident swimmer/snorkeler
• Available to attend intensive training 5-day workshop on Lady Elliot Island from 21-25 November 2019
• Available in volunteer capacity for at least one year starting December 2019

APPLICATIONS are now open closing 1 October 2019

Applications now open closing 1 October 2019

2018 Ambassadors

Learn about corals and reef conservation, reach out & inspire others

This Ambassador workshop is supported by:
Participants will be selected through a formal application process. Download the application form from WWW.CORALWATCH.ORG and propose your Ambassador ideas to CoralWatch before 1 October. CoralWatch will deliver an intensive 5-day workshop, materials, expertise and onward support. Participants pay for their own transport to Hervey Bay (QLD), and a workshop contribution fee of $200 AUD. Any questions: Diana Kleine at info@coralwatch.org

Workshop Feedback
You really moved us forward a long way in a short time…. We learnt (classroom) – we investigated (in water) – we applied (data collection) – we taught (resort guests). Classic pedagogy! Paddy, head of science Kirwan State High School, Townsville

Best part of the workshop: Meeting like-minded people from vastly different backgrounds has restored a lot of faith in reef conservation. Amalya, 3rd year student, Sunshine Coast.

Being encouraged/asked to present and be a part. I may not have volunteered on my own but I loved it. Thank you for encouraging me to get out of my comfort zone. Maddie, UQ 3rd year science student, Brisbane
