Coral Coast Virtual Reef

This virtual reef shows you different coral types and the difference between healthy and bleached corals. You can use the Coral Health Chart to measure the health of these corals.

CoralHealth Chart

CoralWatch developed a simple tool that anyone can use to measure coral colour - the Coral Health Chart. The chart is based on the actual colours of healthy and bleached corals.

For each coral record:
- darkest and lightest colour scores
- coral type.

DID YOU KNOW?

CoralWatch integrates global monitoring of coral bleaching with education about coral reef conservation.

1. Visit CoralWatch global database to view Coral Coast and worldwide data for reefs. You can compare coral health scores between reefs and over time.

WWW.CORALWATCH.ORG

SOME CORALS ARE NATURALLY LIGHTER, ONLY REGULAR SURVEYS CAN SHOW TRENDS OF BLEACHING AND RECOVERY

CORALS ARE FRAGILE AND CAN ONLY GROW UP TO 10 CM PER YEAR

YOU CAN HELP!

Get involved and monitor your local reefs.

CoralWatch’s ‘Corals at Your Doorstep’ project is supported by the partnership between the Australian Government’s Reef Trust and the Great Barrier Reef Foundation.
