

# Virtual Reef

This virtual reef shows you different coral types and the difference between bleached and healthy corals. You can use the Coral Health Chart to measure the health of these corals.

B1	B2	B3	B4	B5	B6	C1	C2	C3	C4	C5	C6
E6	E5	E4	E3	E2	E1	D1	D2	D3	D4	D5	D6

## CORAL HEALTH CHART

The Coral Health Chart is based on the actual colours of bleached and healthy corals. Each square on the Chart corresponds to the concentrations of symbiotic algae which live in the coral tissue.

**TIP**  
Avoid measuring growing tips of corals because they are naturally white.

## INSTRUCTIONS

- darkest and lightest colour scores
- coral type
