

# The water cycle

## Instructions

1. Label the diagram above with the following words:

Liquid  
Evaporation

Gas  
Precipitation

Solid  
Condensation

2. Fill in the blanks using: **Condensation, Evaporates & Precipitation**

Water from the oceans \_\_\_\_\_ and enters the atmosphere in the form of water vapour.

When water vapour cools down, it becomes liquid again, \_\_\_\_\_ into small droplets, which form clouds.

When clouds become too heavy, the water vapour returns to earth as \_\_\_\_\_.

3. Label the three physical states of water with: **Liquid, Solid & Gas**

Water vapour

Precipitation

Iceberg

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_
